SUMMARY OF QUALIFICATIONS

- 8 years of experience as a Software Developer with strong expertise in **.NET Technologies, Azure, Sql Server and Full Stack Development**
- Proficient in designing and developing scalable web applications using **C#, .NET 8, ASP.NET Core/MVC/Web API, React, and SQL Server**, with strong knowledge of **RESTful APIs**, advanced routing, filtering, pagination, versioning, Swagger documentation and deploying to Azure.
- Experience of **building Azure Functions** with diverse **triggers, bindings, inputs, and outputs integrating with Azure SQL, Cosmos DB, Blob Storage, Queue Storage, Event Grid, Event Hub, and RabbitMQ** to create highly scalable, **event driven**, and automated cloud workflows.
- Proficient in **SQL Server: writing queries, joins, stored procedures**, indexing basics, and integrating databases with .NET applications.
- Experience with **Microservices Architecture**, Domain Driven Design (**DDD**), **CQRS**, event driven systems multi tenant solutions and distributed systems.
- Specialized in **Azure services**: App Services, Functions, Storage, Queues, Messaging and **CI/CD pipelines** with **GitHub Actions** and **Docker**.
- Expertise in **LINQ, Entity Framework Core**, including query optimization and advanced Fluent API configuration.
- Skilled in frontend development using **React, Angular, TypeScript**, jQuery, Bootstrap, building admin and user panels, dynamic dashboards, and data visualizations.
- Proficient in **unit testing with XUnit, NUnit, Moq**, code reviews, refactoring, and delivering clean, maintainable, high-quality software.
- Proficient in code **Refactoring, Debugging**, and delivering clean, maintainable, high-quality software.

Skills

- **Back-End:** C#, .NET 8 / .NET Core, ASP.NET Core, ASP.NET MVC, Web API, Entity Framework Core, JWT, SQL Server, PostgreSQL, Power BI, Microservices, IIS, Azure Services (App Services, Functions, Messages, Events, SQL Database, Storage Unit Testing (xUnit, NUnit, Moq), CQRS, Domain-Driven Design (DDD), API Versioning, Advanced Routing, Multi-Tenant Architecture
- **Front-End:** HTML5, CSS3, Bootstrap, JavaScript, jQuery, React, Angular, TypeScript, Razor Pages, Dynamic Dashboards & Data Visualization
- **Tools & DevOps:** Visual Studio, Git, Bitbucket, TortoiseGit, SourceTree, TeamCity, Azure DevOps, Docker, Postman, Swagger, Jira, Confluence, ServiceNow, Salesforce, Microsoft Dynamics, CI/CD Pipelines, Github Actions, Azure Devops

EMPLOYMENT HISTORY

Software Engineer - Enghouse Interactive, Toronto, ON - Sep 2022 – Aug 2025

- Developed ETL reporting systems using .NET 8, ASP.NET Web APIs, Entity Framework, JWT authentication, Azure services, Docker, and React, enabling secure generation and visualization of operational data with improved accuracy and efficiency.
- Contributed to CRM integration projects, upgrading legacy systems to .NET 8, integrating SignalR, Entity Framework, LINQ, RESTful APIs, JWT, TypeScript, and React.
- Built BI reporting systems comparing tenant data across contact center platforms, automating data correction and insertion workflows with C#, ASP.NET Core, Entity Framework, PostgreSQL, JWT, and Docker.
- Designed and developed event driven backend systems integrating with multiple contact center platforms to manage telephony workflows (call handling, agent queue tracking, wrap-up codes).
- Implemented API versioning, advanced routing techniques, query parameters, filtering, sorting, pagination, and documented APIs with Swagger.
- Designed and configured database relationships using Fluent API (one-to-many, many-to-many) with model validation, dependency injection, and tenant based configuration/versioning for multi-tenant applications.
- Built authentication & authorization mechanisms: JWT bearer tokens, role-based access, refresh tokens, password hashing, forgot password workflows, and email notifications.
- Developed background services and custom middleware with standardized responses using ProblemDetails (RFC 7807) for consistent error handling and unified response models (Success, Errors, Data).
- Automated CI/CD pipelines using GitHub Actions, Docker and deployed solutions to Azure.
- Created responsive front-end features in TypeScript for dynamic reporting dashboards and data visualization.
- Wrote unit tests with XUnit, NUnit, and Moq, integrated with TeamCity for CI build reports.
- Participated in code reviews, ensuring maintainable, clean, and high-quality software delivery.

Full Stack .NET Developer - Parsian Tadriz, Tehran, Iran Sep 2020 – Sep 2022

- Designed and developed high-performance, scalable web applications for heavy-load users using Microservices architecture, .NET Core, ASP.NET MVC/Razor Pages, Entity Framework Core, and SQL Server.
- Built RESTful APIs and implemented Domain-Driven Design (DDD), CQRS, message queueing with RabbitMQ, background services, and API Gateway for efficient microservices communication.
- Contributed to front-end development with Angular 8, jQuery, Bootstrap, and JavaScript, developing admin and user panels with dynamic, responsive interfaces.
- Implemented globalization and localization, data annotations, Notracker EF Core performance techniques, LINQ optimizations, and caching strategies to improve backend efficiency.

- Diagnosed and resolved performance bottlenecks, optimized backend logic, and ensured scalable, maintainable code across microservices.
- Designed and maintained multi-tenant solutions, CQRS patterns ensuring secure, efficient data handling and cross service communication.

Web Developer (ITK Home), Toronto Jun 2018 –Sep 2020

- Involved in the complete Software Development Life Cycle.
- Built application using ASP .Net MVC, Entity Framework, JavaScript, HTML5, CSS3 and Bootstrap.
- Customized online Shopify store using HTML, CSS, JavaScript and Liquid while considering user friendly and responsive web design.

EDUCATION & CERTIFICATIONS

Microsoft Azure Training YT2LE, Toronto, ON

Cloud Computing & Azure Administration Aug – Sep 2020

.NET Development Certificate Southern Alberta Institute of Technology (SAIT), Calgary, AB 2016 – 2017
